

## Gym Floor Cover Care/Cleaning Instructions

**Your floor cover is easily cleaned using water and mild dishwashing liquid.**

1. When using your gym floor cover panels we suggest taping all sections, entrances and exits.
2. To clean manually sweep the cover with a dry mop or broom.
3. For light cleaning use water only. A spray bottle is an easy, controlled method to apply water.
4. For more stubborn marks or dirt add a small amount of mild dishwashing liquid or a diluted cleaner degreaser.
5. Scrub with using a soft sponge mop or by placing a cloth over a push broom.
6. If using dishwashing liquid rinse thoroughly with water.
7. Make sure cover is **completely** dry before rolling and storing.
8. Always test a small area with any cleaner you are trying before distributing over entire cover.
9. Do not power wash. This could harm the vinyl.
10. For black shoe scuff marks and other hard to remove stains try **Regular rubbing (isopropylene) alcohol**
11. For stubborn marks our All Natural Citro™ Cleaner is available.

### **Not recommended for use on any painted areas**

It gently removes shoe polish, paints/ink, lipstick, glue, adhesive and much more.

All Genuine THOR Tarp brand gym floor covers have anti-microbial additive to resist mildew and fungus.

**Warning:** Clorox is never recommended for use in cleaning any vinyl floor covers. When mixed with other chemicals, it may cause invisible, odorless and deadly fumes.
